9.01 Quiz 4

Name _____

10/08/2003

1) Describe one of the long pathways connecting the neocortex with the spinal cord. State the direction of information flow, and specify the location of the cell bodies and the synaptic connections.

2) Describe either the sympathetic or the parasympathetic innervation of the heart.

3) Describe the eyeblink reflex: location of cell bodies and synapses involved.
